

PRODRILL FLUID TECHNOLOGIES

Innovative Ideas to Reduce Overall Well Costs

About

CCS ProDrill Fluid Technologies provides complete drilling-fluid management to oil and gas companies in Western Canada and the United States.

Quick Facts

- Recognized for providing well planned and programmed water, oil and synthetic based drilling fluid products and systems
- Leaders in providing SAGD and Heavy Oil bitumen drilling fluids and services
- ProDrill offers industry break through proprietary products for Heavy Oil drilling, including our patented ProDrill Bitumen Encapsulator
- Extensive experience with a variety of inhibitive water based and oil-based fluids, most notably the industry leader ProDrill 2000 system
- Integrated CCS solutions and project management for minimizing water usage, recycling fluids, reducing waste volumes and disposing of drilling waste

Benefits

- low-cost base oil for invert drilling
- complete laboratory facilities for problem solving
- in-house customer training, mud schools and seminars
- safe, cost effective and efficient drilling solutions
